

BALLOT

DID YOU KNOW? Election Issues

That upon the commencement of the opening of the outer envelopes or the accessing of electronic votes, whichever occurs first, voting shall be closed and no additional ballots may be collected by the association?

That, in an effort to verify ballot outer envelopes, an association may create an impartial committee to hold a meeting on election day to verify the outer envelopes before the election? However, if the association chooses to do so, the committee meeting must be open to all unit owners and noticed in the same manner that unit owner meetings are noticed.
