

THE PRELIMINARY TEXT OF THE PROPOSED RULE DEVELOPMENT IS:

61D-14.061 Slot Cash Storage Boxes.

(1) Each slot cash storage box shall:

(a) Have two separate locks that shall only be opened by keys that are different from each other;

(b) Have a device that prohibits access to the contents of the slot cash storage box, when it is removed from the machine; and

(c) Have an asset number that corresponds to the asset number of its assigned machine and is identifiable by the surveillance system referenced in Rule 61D-14.054, F.A.C.;

(2) Emergency slot cash storage boxes that are used when the slot cash storage boxes of a specific machine are not available or become full in the machine to which it is assigned shall be maintained without asset numbers, provided:

(a) The word "emergency" is permanently imprinted, affixed or impressed thereon; and

(b) The emergency slot cash storage box is temporarily marked with the asset number of the machine to which it is assigned.

(3) Full cash storage boxes when removed from a machine must be taken directly to a physically secured cage or taken directly to the count room under constant surveillance observation and security escort.

(4) The surveillance department shall be notified and conduct recorded surveillance of all access to or removal of cash boxes. A slot machine licensed facility security representative shall also be present during access to any cash box.

~~(5)~~(3) Nothing in this rule shall be interpreted to prohibit the use of a bar code or similar device for tracking of slot cash storage boxes, so long as the requirements of this section are met.

Specific Authority 551.103(1), 551.122 FS.

Law Implemented 551.103 (1)(d), (1)(g), (1)(i), FS.
