

Board Approved Pre-Licensure Wind Mitigation Techniques Course

The statute requires a minimum of 2 hours in wind mitigation techniques prior to licensure. Complete a combination of the acceptable courses listed below. Wind mitigation or technique courses taken from “continuing education” providers will not be accepted.

Wind Forces Part 1: The Nature of Wind & Its Implications for Buildings

Wind Forces Part 2: Wind Effects & Procedures for Wind-Resistant Design in Practice

Wind Forces Part 3: Concepts & Descriptive Examples of Building Design for Wind

Wind Forces Part 4: Improving Building Wind Resistance & Stabilization

Wind Forces Part 5: Wind Pressure Analysis, Strengthening Buildings, & Practical Considerations

The courses are offered by the National Council of Architectural Registration Boards (NCARB) at ncarb.org.

***This requirement only applies to direct, state, and NCARB endorsement applicants.**
