AD HOC COMMITTEE – DON WILFORD/MARK PIETANZA

Mr. Wilford gave the following report:

The Ad Hoc Committee reviewed the revised application forms for the EZ Apply project.  
Mr. Harrell informed the board that the idea of requesting transcripts as proof of pre-licensure education would not be implemented by the Department so that statement will be removed from the application.  Concerns were expressed by the board concerning this issue and the idea of randomly auditing applications for proof of education was mentioned.

Mr. Harrell moved on the section where an applicant verifies their employment history.  
The application requests the applicant indicate the specific experience they have gained under a particular employer, and to submit as many of those application sheets as is necessary.  The suggestion to include the statement, “use additional sheets as necessary for each employer”, needed to be added to clarify that all the information should not be included on a single page, and that information submitted on pages other than the application pages would not be accepted.

The subject of proof of financial responsibility by the applicant was brought up.  The new application will ask the applicant if they have a credit score of 660 or higher to demonstrate financial stability, and if not, the financial stability requirement may be met by taking a 14 hour financial responsibility course and submitting a bond or irrevocable letter of credit, the amount to be determined by the type of license being applied for.  The board suggested that the application include the statement that the 14 hour course be live and not an internet course.  The board was advised by a CE provider to rethink making it a requirement for the class to be live as the costs for the contractor and provider would be significantly higher if the course had to be live instruction only.  The
board still expressed concern over the possible dishonesty that could occur with the internet course.

A board member asked if the experience history section could be amended to include a statement that no attachments be submitted in place of the application pages. Board staff stated that it would be noted on the application that applicants are not to use forms other than the application pages.

The board also expressed gratitude for Oscar Gertsch for his work on these applications.

A member of the public, Fred Dudley, asked the board if the bond underwriters had given an estimate of the premiums for the bonds or irrevocable letter of credit. Mr. Harrell answered that discussions with bond providers indicated the premium would be about 2% of the bond. Mr. Dudley asked the board that if the license holder does not renew the bond and fails to submit proof of a 660 credit score, how the Department will know he is failing to maintain the financial stability requirement. Mr. Harrell answered that the Department won’t know and that the Department will not track these bonds. That responsibility belongs to the licensee and the Department will only take action against that licensee if a disciplinary issue arises. Mr. Dudley asked that if the licensee will have to provide proof of a 660 credit score or proof of still having the bond at the time of license renewal. Mr. Harrell responded that financial responsibility needs to be determined only at the time the license is issued and the statutes do not contemplate having to prove financial responsibility at the time of renewal.

Mr. Trim asked the board if the Department will have an original copy of the bond and if they will track the bond, and asked how the Department will call upon the bond if the need arises. Mr. Trim also asked if the board is delegating authority to the bond companies to determine when an applicant reaches a 660 credit score. Mr. Harrell stated these issues will be addressed at the public workshop in Tallahassee at a future date.

Mr. Harrell reminded the Board that the legislature has not given the Board or the Department the authority to perform ongoing audits.

Mr. Harrell shifted the discussion to the additional business entity application forms. Mr. Harrell stated that the current process for additional entity applications is that if an applicant does not own at least 50% of the business it requires automatic board review. Mr. Harrell stated that the new application will ask if the applicant can provide the proper supervision and proper financial supervision. Mr. Harrell stated that while there are no on-site supervision or financial supervision requirements in the statute or rule, the board may inquire as to how the applicants intend to effectively manage the construction activities of both businesses, and how the applicant manages to show financial supervision, and the board may consider ownership interest and employee relationships as credible evidence of financial supervision. Mr. Harrell stated that this information will appear on the applications.

Mr. Harrell moved the discussion to the issues surrounding pre-licensure education, and that the issues will continue to be discussed in the future.
With nothing further to report the board voted unanimously to approve this report.

OLD BUSINESS

Removal of Board materials from lap tops.

NEW BUSINESS

R. Bruce Kershner, Vice President of the Underground Utility Contractors of Florida, addressed the board and requested that the board reiterate its opinion on a previous declaratory statement that the board issued concerning certified underground utility and excavation contractors being able to perform work on fire sprinkler systems. Mr. Kershner has stated some opposition has arisen from the Fire Marshall’s office. The board made a motion which was seconded and approved unanimously to reiterate the position which was previously decided upon by the board.

Mr. Harrell informed the board that House Bill 849, which was recently passed by the legislature, requires licensed home inspectors to take a 3 hour course, approved by the Construction Industry Licensing Board, if they wish to submit uniform mitigation verification forms for insurance purposes. These courses will appear in front of the CE Committee in the near future. A copy of the proposed new uniform mitigation form was also distributed to board members for their review.

With no further business the meeting was adjourned at 10:16 am.
