Major Issues/Actions

- This was the initial meeting to discuss possible legislative language to develop a statute that addresses electrical systems agents. The proposed language mirrors many of the requirements for alarm system agents and fire alarm system agents referenced in Sections 489.518, and 489.5185, F.S. respectively. This is an attempt by the board to raise the standards and work requirements of individuals performing electrical work for the licensed contractors. The board will again address the proposed language at its upcoming board meeting scheduled for September 22, 2005, in Palm Beach, Florida.
