I. INTRODUCTION

This Candidate Information Booklet (CIB) is designed to introduce Computer Based Testing and provide candidate information for this examination.

The Department of Business and Professional Regulation has retained the services of Pearson VUE to schedule, administer, score and report the results for computer based testing. Pearson VUE is a leading provider of assessment services to regulatory agencies and national associations and offers licensing and credentialing support services to associations, state agencies and private industry.

Your examination(s) will be administered on an electronic testing system. The testing system eliminates the use of paper, pencil and answer sheets. Candidates input their responses by entering the answer of their choice (A, B, C or D). Before you begin the examination, you will have an opportunity to go through a tutorial on the computer. The computer is very simple to operate; it should only take you a few minutes to learn to use it.

The screen features a variety of function buttons to help candidates navigate through the examination. The function buttons are located in the same position throughout the test.

Candidates can mark a question for review, move forward or backward one question at a time, or move to a specific question.

The summary screen, which can be accessed at any time during the examination, shows candidates the following:

- Number of questions answered
- Number of questions unanswered and/or skipped
- Time remaining for the examination

PILOT TESTING

The examination may contain a small number of experimental or “pilot” test questions. The purpose of including pilot test questions within the examination is to expand and improve the bank of questions from which future examinations will be drawn. This is a common practice used by many national and state examination programs and is a critical step in ensuring the continued reliability and validity of these examinations. In the event that pilot test questions are included within the examination, these questions will not be counted when computing your scores. Additional time will be given for answering the pilot test questions. The time allowed for testing has been evaluated to ensure there is adequate time for completing test questions and pilot questions.

Pilot questions are not identified. If the pilot questions were identified, many of the candidates would skip them, and the results would not be valid. The development of a good examination requires accurate candidate response information for the pilot questions.

TEST TAKING ADVICE

The advice offered here is presented primarily to help you demonstrate knowledge and maximize your chances of passing the examination.

- Read all instructions carefully.
- For best results, pace yourself by periodically checking your progress. This will allow you to make any necessary adjustments.
- Be sure to record an answer for each question, even the items about which you are not completely sure. Remember, the more questions you answer, the better your chances of achieving a passing score. There is NO penalty for guessing, so you should answer every question. You can note the questions you wish to reconsider on the computer testing system and return to them later.
- Alert a Proctor or Test Center Manager to any problems that may occur during the examination. Do not wait until the examination is over to inform someone about a problem.
