

GENERAL CONTRACTORS PROJECT MANAGEMENT EXAMINATION CONTENT INFORMATION

Revised September 5, 2014

The Project Management portion of the examination will be administered daily in Computer Based Testing (CBT) format. The examination will consist of 60 equally weighted questions covering managing, controlling, and conducting a specific project.

The examination will have questions relating to the following content areas and necessary knowledge for each area includes:

- reading and interpreting plans and specifications
- reading and interpreting codes
- basic mathematics (addition, subtraction, multiplication, division, calculations of area and volume, fractions, decimals, percentages, calculating the sides of triangles, square roots, powers of numbers, and solving simple algebraic equations for unknown variables)

You should be prepared to respond to examination questions on any of the content areas listed. Questions asked and content areas tested on previous examinations should not be assumed to be the only possible questions to be asked or content areas to be tested on this examination.

The percentage of questions shown for each content area may vary by as much as plus or minus three (3) percent. Please refer to the Candidate Information Brochure and the Reference List for additional information.

Content Area E **67%** **Construction Methods, Materials, Tools, and Equipment**

1. Site layout

construction layout

- benchmarks
- elevations
- setbacks

site plan interpretation and knowledge

2. Soil conditions

types and characteristics of soils

- compaction
- density
- proctor
- moisture content

knowledge of soil reports, soil test results

knowledge of appropriate foundation types given soil conditions

3. Characteristics and uses of survey instruments

builder's level

transit and theodolite

water bubble

string line

laser level

4. Concrete

knowledge of shoring

knowledge of formwork including terminology and techniques

knowledge of loads (e.g., volume, pressure)

knowledge of systems and methods for concrete

- footings
- piles and pile caps
- placing slabs and decks
- columns
- walls

knowledge of proper forming practices, bracing and erection

knowledge of concrete reinforcement

knowledge of quality control related to concrete

5. Masonry

knowledge of erection and bracing

knowledge of masonry materials and handling

knowledge of quality control related to masonry

- 6. Earth-work**
 - knowledge of excavations
 - cut and fill calculations
 - calculating excavations and grades
 - trenching
 - preparation of site for foundation
 - angle of repose
 - soil compaction
 - knowledge of sheeting, shoring for excavations and dewatering
 - knowledge of erosion control
 - knowledge of quality control related to earth-work
- 7. Wood framing**
 - knowledge of truss erection and bracing
 - knowledge of rafters, floor joists and studs
 - knowledge of and ability to use span tables
 - knowledge of wind loads and fasteners
 - knowledge of roofing and materials
- 8. Steel framing**
 - knowledge of erection and bracing techniques
 - knowledge of metal studs, beams columns and bar joists
 - knowledge of painting and fire protection of steel framing
 - knowledge of welding and connections of steel framing
- 9. Energy efficient construction**
 - knowledge of R-values
 - knowledge pertaining to energy efficiency
- 10. Miscellaneous materials**
 - knowledge of gypsum materials and methods
 - knowledge of plaster materials and methods
- 11. Other tools**
- 12. Other equipment**

Content Area F **13%**
Safety

- 1. Compliance with OSHA standards**
 - knowledge of site layout
 - knowledge of soil conditions
 - knowledge of shoring for concrete
 - knowledge of bracing and erection
 - knowledge of earth-work
 - knowledge of formwork for concrete
 - knowledge of framing
 - knowledge of scaffolding
 - knowledge of trench safety
 - knowledge of ground fault interruption
 - knowledge of record keeping
 - knowledge of fall protection
 - knowledge of other OSHA regulations
- 2. Other safety standards and practices**
 - knowledge of asbestos
 - knowledge of lead paint
 - knowledge of hazardous waste disposal

Content Area G **20%**
Reading Plans and Specifications

- 1. Reading blueprints**
 - ability to read and understand plans and drawings
 - basic math skills and calculations associated with reading blueprints
 - knowledge of architectural and engineering symbols
- 2. Interpreting construction codes and standards**
 - ability to read, understand, and apply codes and standards including building codes
 - knowledge of ADA requirements
- 3. Shop drawings and submittals**
 - ability to understand technical concepts
 - product knowledge
 - blueprint reading and interpretation (e.g., clearances, support clearances, openings)
