## **I. THE EXAMINATION**

### **CONTENT OUTLINE**

The purpose of the examinations is to objectively measure the essential knowledge, skills, and abilities required of the State Pilot. All examination questions are reviewed by maritime consultants to ensure they cover the job-related activities essential to a State Pilot; they are clearly and unambiguously worded; and they are technically correct. The Bureau of Continuing Education and Education Services staff reviews and edits the questions to ensure adherence to testing and measurement principles.

The Board of Pilot Commissioners, pursuant to Section 455.217(1) F.S., specifies that the licensing examination administered by the Department of Business and Professional Regulation shall pertain to the management of vessels and a knowledge of channels, waters, harbors and ports where the candidate for examination wishes to serve and shall include the following content areas:

- I. International Rules of the Road
- II. Inland Rules of the Road
- III. Local or Specific Knowledge of the specified port area
- IV. Federal and State Pilotage Laws and Regulations

Unless otherwise specified, questions will deal with typical merchant vessels, full-bodied and relatively low powered, rather than high powered military vessels with fine lines.

### **PORTS WITH DECLARED STATE PILOT OPENINGS**

The Florida Board of Pilot Commissioners has determined that there is a need for a State Pilot in the following Florida port:

Key West – 1 opening  
Everglades – 1 opening

### **SELECTION PROCESS**

Qualified applicants are examined on four content areas related to piloting and knowledge of the specific port area. Applicants who pass all four (4) content areas are eligible for licensure as a State Pilot in the port for which they were examined.

### **REQUIRED TRAINING PROGRAM**

To be eligible for examination and licensure as a State Pilot, applicants must have successfully completed the Deputy Pilot training program in the port area in which they wish to serve.

## EXAMINATION SCHEDULE

September 14, 2016 7:30 a.m. You will have 4½ hours to complete both the State Pilot and Local Knowledge examination.

## GENERAL INFORMATION – WRITTEN EXAMINATION

There are 250 questions in the examination booklet. The International Rules of the Road Examination consists of questions 1-100. The Inland Rules of the Road Examination consists of questions 101-200. The Federal and State Piloting Regulations Examination consists of questions 201-250. Most questions are true/false questions. Some questions are multiple choice questions with four alternatives (choices) for each question. You must mark your answers to all questions on the answer sheet.

All questions are equally weighted within each examination.

Many of the questions ask you to distinguish between what is permitted and what is required under the laws and rules. For example, a statement that an automobile **MAY** stop at a stop sign is considered a false or incorrect statement. According to the laws and rules, the driver **MUST** stop. Also, if lights are shown which indicate that a vessel **IS** underway, a statement that the vessel **COULD** be underway would be a false or incorrect statement. A vessel displaying such lights **WOULD** be underway. Alternatively, if lights are shown which indicate that a vessel **COULD** be either underway or at anchor, a statement that the vessel **WOULD** be underway would be a false or incorrect statement. **For this reason, you must attend to words in the questions such as must, may, shall, would, could, etc..**

While many examination questions are difficult and require that the candidate have detailed knowledge in order to respond correctly, no attempt is being made to trick or fool the candidate. Therefore, candidates should not read more into the question than is actually there, as that could result in the candidate being unable to fully demonstrate his knowledge. For example, if a question refers to automobile headlights, a statement that an automobile must show headlights at night is to be considered a true or correct statement, even though no mention is made of the also required tail lights. However, if a question refers to automobile lights required to be displayed (rather than referring only to headlights), then the correct or true statement would have to include both headlights and tail lights.

Be sure to read the lead-in paragraphs before each examination section.

### **Unless otherwise stated or implied in the questions, assume that:**

1. there is ample time and sea room to make whatever maneuvers are called for in the situation;
2. vessels are in sight of each other (reduced or restricted visibility implies vessels are **NOT** in sight of each other);
3. all vessels are power driven vessels and are to be considered fully functioning vessels with no maneuvering restrictions; do not assume special conditions if none are specified;
4. any lights referred to are displayed at night and any shapes referred to are displayed during the day;

5. lights shown or referred to are the **minimum** lights required by the rules for their size, class, condition, etc. (for example, a 12 meter vessel would show the lights of a 12 meter vessel, not of a 50 meter vessel);
6. use of "requires", "displays" or "shows" with regard to navigational lights indicates that you can see these lights but the vessel may also display additional lights when presenting another aspect;
7. "requires only", "displays only" or "shows only" indicates these are the only navigational lights on the vessel, regardless of aspect;
8. towed vessels are **not** inconspicuous or partly submerged unless so specified;
9. vessels are in compliance with the rules applicable to the waters upon which they are operating at the time; and
10. regulations for navigational lights on vessels reflect those for the harbors and approaches in Florida and do not reflect special lights permitted on Western rivers, the Great Lakes, etc..

Terms used in the Rules of the Road such as "keep out of the way of", "shall not impede", "restricted in ability to maneuver", "constrained by her draft", "engaged in fishing", etc., are used in accordance with the definitions contained in the Rules.

Some questions direct you to refer to a figure. You will find these figures in the two booklets labeled "Light Configurations" and "Figures and Diagrams." Please make sure that you have a copy of each of these booklets. Be sure to read the **NOTES** on the cover of the "Light Configurations" booklet. "Figures and Diagrams" are used to illustrate aspects of the vessels or the situations and are **NOT** drawn to scale.

You may request a Question-Comment Form to record any comments that you have on a question or questions. This form is used to improve the overall quality of the examination, not to challenge its contents. Be sure to write your Candidate ID # on the form and turn it in with your examination materials at the conclusion of your examination.

#### **GENERAL INFORMATION - LOCAL KNOWLEDGE EXAMINATION**

Please make sure that you have the Local Knowledge examination booklet for your port. There are no more than 50 questions in this examination booklet. (The exact number of questions has not yet been determined.) All questions are true/false questions with two alternatives (choices) for each question. All questions are equally weighted. **You must mark your answers to all questions on the blue answer sheet.**

Responses to this examination are to be based upon the most recent edition, which is readily available to the public prior to the examination date, of the following publications:

- A. United States Coast Pilot
- B. Coast Guard Light List
- C. Chart(s) for your Port

- D. Tide and Tidal Current Tables
- E. Port Authority Publications
- F. Corps of Engineers Surveys
- G. Captain of the Port Orders and/or Recommendations
- H. Operation standards and navigation guidelines as filed with the Board and practiced in the Port
- I. Actual practices developed and followed in the Port

In addition, you are responsible for any updates or corrections to the above and for any other information vital to mariners contained in all Notices to Mariners published through June 1, 2017.

If you use information from sources more recent than those noted above, you must indicate the source so that it can be verified and proper credit given. Information regarding direct personal observation is neither required nor desired. Responses to this examination must be based upon information disseminated through official sources which can be verified. If there is a conflict between official sources, use the most recent available information.

You may request a Question-Comment Form to record any comments that you have on a question or questions. This form is used to improve the overall quality of the examination, not to challenge its contents. Be sure to write your Candidate ID # on the form and turn it in with your examination materials at the conclusion of your examination.

- A. accept a pilot who has only a state license.  
B. accept a pilot who has only a federal license.  
C. accept a pilot who has either a state license or a federal license (either one is acceptable).  
D. do nothing since a coastwise vessel does not require a pilot.
6. On a foreign flag vessel of 2500 GRT operating in confined or congested U.S. waters, propulsion machinery must be capable of operating ahead and astern.
- A. True  
B. False

### **ANSWER SHEET**

Your answers must be recorded on the answer sheet provided to you at the examination. Answers recorded in the examination booklet will not be scored. The answers to the sample questions are: 1-A; 2-A; 3-B; 4-B; 5-B; and 6-A.

### **PILOT TESTING**

The examination may contain a small number of experimental or “pilot” test questions. The purpose of including pilot test questions within the examination is to expand and improve the bank of questions from which future examinations will be drawn. This is a common practice used by many national and state examination programs and is a critical step in ensuring the continued reliability and validity of these examinations. In the event that pilot test questions are included within the examination, these questions will **NOT** be counted when computing your scores. Additional time will be given for answering the pilot

test questions. The time allowed for testing has been evaluated to ensure there is adequate time for completing test questions and pilot questions.

Pilot questions are **NOT** identified. If the pilot questions were identified, many of the candidates would skip them, and the results would not be valid. The development of a good examination requires accurate candidate response information for the pilot questions.

### **TEST TAKING ADVICE**

The advice offered here is presented primarily to help you demonstrate your knowledge and maximize your chances of passing the examination.

- Read all instructions carefully.
- For best results, pace yourself by periodically checking your progress. This will allow you to make any necessary adjustments. Remember: the more questions you answer, the better your chances of achieving a passing score. There is no penalty for guessing, so you should answer every question.
- Be sure to record an answer to each question on your answer sheet as you proceed through the examination. You may mark the questions in your examination booklet and return to them later.
- Make sure that all answers are marked on your answer sheet before time is called. **No additional time** will be allowed for transferring answers from your examination booklet to your answer sheet.

**Remember you will ONLY receive credit for answers marked on your answer sheet.**

Immediately alert your proctor of any problems involving your examination materials. **Do not** wait until the examination is over to inform someone of a problem.
